Nicolás Scarselli

PROFILE

I design digital products that have to truly work: with real users, concrete business goals and technical constraints that can't be ignored. I have more than 18 years of experience in digital product, UX/UI, graphic design and visual communication. I have worked on iTV, streaming, digital banking, web and mobile for large-scale audiences across Latin America, and I have also developed identities, campaigns, presentations, social media content and editorial pieces. My strength lies in organizing complex problems, turning them into clear systems and guiding the solution through to production, combining product judgment, visual craft and technical knowledge. I integrate AI into research, exploration, content creation, prototyping and documentation, with human review on every deliverable.

PROFESSIONAL EXPERIENCE

Senior UX/UI Designer

Feb 2024 - Present
Buenos Aires, Argentina

Accenture | Client: Grupo Werthein - DIRECTV / SKY

- I design iTV experiences for DIRECTV and SKY across different platforms and set-top box models, reaching more than 10 million subscribers in Latin America.
- I created and maintain a Figma design system with more than 120 components, tokens, grids, states and variants. It is reused across eight products and cut new-screen design time by about 35%.
- I work with Product to turn business requests into flows, interfaces and behavior criteria that the engineering team can implement within two-to-three-sprint cycles.
- I standardized handoff and documentation in Figma, reducing queries and corrections between Design and Development by roughly 30%.
- I collaborate with distributed teams in Argentina, Brazil, Mexico and the United States, with daily written communication and documentation in English.

Senior UX/UI Designer

Nov 2021 - Jan 2024
Buenos Aires, Argentina

DIRECTV / SKY / Vrio Corp

- I designed more than six products end to end, including the DSports Statistics Portal for the FIFA World Cup 2022, Gran Hermano cameras, the DGO Betting App and configuration tools for SKY.
- I redesigned critical navigation for SD, HD and legacy set-top boxes. The change reduced UX-related support tickets by 22% and reached more than 8 million active users.
- I led the work from research and information architecture through prototypes, validation, handoff and implementation follow-up, keeping a single source of truth in Figma.
- I solved interfaces for remote-control navigation, reading at a distance and hardware from different generations, keeping consistency and performance without ignoring product constraints.

UX/UI Designer

Nov 2020 - Sep 2021
Buenos Aires, Argentina

Red Link

- I designed tools, applications and dashboards for financial institutions, within products with demanding security and compliance requirements.
- I built interactive prototypes of more than 80 screens per product to validate decisions with the business before development began.
- I took part in the evolution of the Material Design-based design system and supported the Angular implementation to keep fidelity between design and the final product.

SPECIALTIES AND TOOLS

Product and UX

Product Design, UX/UI, information architecture, user flows, wireframes, prototypes, usability testing, WCAG accessibility, responsive, mobile, iTV and 10-foot UI.

Systems and delivery

Design systems, component libraries, design tokens, documentation, DesignOps, handoff, Design QA and collaboration with Development.

Tools

Figma, FigJam, Adobe Creative Cloud, Miro, Maze, Jira, Confluence, Azure DevOps, Pipefy, HTML5, CSS3, Bootstrap, WordPress, Webflow, Visual Studio Code and Git. AI: Copilot, Adobe Firefly, Figma AI, Claude, Gemini, NotebookLM and ChatGPT.

ADDITIONAL CAPABILITIES

Brand and visual communication

identity, art direction, campaigns, presentations, social media content, editorial design, commercial materials and multi-format adaptation.

AI applied to creative work

Copilot, Adobe Firefly, Figma AI, Claude, Gemini, NotebookLM and ChatGPT for research, synthesis, ideation, visual generation, content, documentation and speeding up repetitive tasks. I use these tools to support the process, not to replace design judgment.

EDUCATION

Bachelor's Degree in Graphic Design - Universidad de Flores, 2008.

Continuing education in UX/UI, design systems, accessibility and AI applied to design.

PROFESSIONAL EXPERIENCE · CONT.

Senior Digital & Web Designer

Nov 2016 - Sep 2020
Buenos Aires, Argentina

Latcom / Contenidos Advertising

- I designed and developed websites, microsites, newsletters and presentations for more than 50 clients, combining UX/UI, HTML, CSS, Bootstrap and WordPress.
- I coordinated editorial projects and OOH materials with sales teams, printers and suppliers, from the initial request to final production.

UI/UX & Multimedia Designer

Oct 2011 - Oct 2016
Buenos Aires, Argentina

Timwe Tech

- I designed mobile portals and landing pages for carriers such as Claro and Movistar, with visual systems and subscription flows adapted to different content verticals.
- I created an internal brand guide applied to more than ten types of pieces and produced more than 50 commercial presentations and audiovisual content for Marketing.

Graphic & Web Designer

Jun 2006 - Sep 2011
Buenos Aires, Argentina

CT Educacion + Eventoplus

- I developed websites, email campaigns, editorial pieces, identities and commercial materials. This stage gave me a practical foundation in visual design, prod. and front-end.

SELECTED PROJECTS

DIRECTV - Qatar 2022 Statistics Portal

I redesigned the visual architecture and user journeys of a 10-foot experience for quick lookups from TV, with reusable components and remote-control navigation.

Procrisa - Industrial digital presence

I organized an extensive technical offering, designed the responsive experience in Figma and built the WordPress site so it would be clear, professional & manageable.

Build Africa Expo - Brand identity

I built a modular visual system for promotion, signage, printed materials, physical spaces and digital environments, ready to grow without losing recognition.

Iris Hotel - Digital experience

I designed a responsive site in Spanish, English and French, with editorial content, room search and a more direct path to booking.
